LVHN Cancer Institute Joins MSK Cancer Alliance

The [LVHN Cancer Institute](#) is now a formal member of the Memorial Sloan Kettering (MSK) Cancer Alliance, a transformative initiative to improve the quality of care and outcomes for people with cancer in community health care settings. Representatives of both organizations made the announcement at LVH–Cedar Crest following an intensive six-month collaborative review process.

The LVHN Cancer Institute's membership in the Alliance will enhance research capabilities at LVHN, allowing LVHN to deliver world-class, research-based treatments directly to patients. With the review process complete, there are three key ways patients of LVHN are benefiting from this unique partnership:

- **Adoption of MSK standards of care into everyday practice.** MSK is a world leader in setting the highest standard of oncology care. By keeping up to date with the latest innovations, LVHN cancer specialists make treatment decisions for their patients based on the best and most current evidence available.
- **Integrated learning.** Oncologists from both organizations are regularly meeting to discuss challenging patient cases to help identify the best treatment course for patients. Membership in the MSK Cancer Alliance also provides LVHN physicians with educational opportunities at MSK.
- **Access to key MSK clinical trials.** [Cancer clinical trials](#) can give patients the opportunity to receive drugs or therapies years before they're available anywhere else. Plans are under way to open dozens of MSK trials at LVHN in coming years. Opening these MSK trials at LVHN helps to speed up the data-collection process so investigational therapies can be approved faster and become available to even more patients.

"At LVHN, our commitment to providing quality care has meant that we've long given people access to the latest cancer treatments and clinical trials," says LVHN President and CEO Brian Nester, DO, MBA, FACOEP. "We also know that when facing a foe like cancer, you can always do more. Memorial Sloan Kettering, a world leader in cancer research, is helping us take our fight against cancer to a new level."

"At Memorial Sloan Kettering, we are relentless in our pursuit of improving cancer care, and part of that effort includes sharing new knowledge with others and, in turn, learning from them. We are proud and excited to see this new model of collaboration take shape so that the highest-quality cancer care is more accessible to more patients," says Craig Thompson, MD, president and CEO of MSK.

MSK established the MSK Cancer Alliance as a way to rapidly move more innovative, evidence-based cancer care into the community setting and enable learning across institutions. The LVHN Cancer Institute – the part of LVHN that focuses on cancer research, patient care, the development of its cancer program, and membership in the MSK Cancer Alliance – was selected as the second member of the Alliance because of LVHN's dedication to delivering high-quality, consistent care and the proven expertise of its physicians and medical teams. Connecticut's Hartford Healthcare Cancer Institute became an official member in 2015, and in March 2016, Miami Cancer Institute at Baptist Health South Florida announced its intention to become the third Alliance member.

"The goal of the Memorial Sloan Kettering Cancer Alliance is to rapidly accelerate the pace of integrating the latest advances of cancer care into a community setting," said MSK Physician-in-Chief José Baselga, MD, PhD. "This unprecedented approach has and will continue to demonstrate real value to all involved and, most importantly, will improve the lives of people with cancer. Our partnership is designed to adapt and respond to the particular needs of Lehigh Valley Health Network, its clinicians, and patients – and together, we are evolving with the ever-changing practice of oncology."

[Suresh Nair, MD](#), medical director of the LVHN Cancer Institute, said the process to become an official member has been quite intense. "Since the partnership was first announced in August, teams of cancer specialists from both organizations have spent hundreds of hours conducting a rigorous audit of the LVHN Cancer Institute. We had to ensure our standards of care were aligned with the highest standards established by MSK. We've reached that milestone and are excited to collaborate with our colleagues at MSK."

Couples, Individuals Celebrate Match Day Selections

Daniel Myers and Pamela Kim are high achievers who are accustomed to being able to problem-solve their way through most situations. On Match Day at the Renaissance Hotel in downtown Allentown last month, they had to be content with a few jangled nerves while they awaited news of their future as doctors and as a couple.

The two are graduating medical students of SELECT, the medical school partnership between the University of South Florida (USF) Health Morsani College of Medicine and Lehigh Valley Health Network (LVHN). SELECT is an innovative MD degree program that pairs two years of classroom learning at USF Health's campus in Tampa, Fla., with two years of clinical experience at LVHN in the Lehigh Valley.

Myers, a candidate for one of the nation's highly competitive neurosurgery residency spots (about 200 total) and his fiancé Kim, an internal-medicine hopeful, counted down to noon, the start time for the big Match Day reveal. They, along with 40 of their classmates (including two other couples who hoped to match together) and thousands of other U.S. senior students nationwide, were on pins and needles as they waited their turn to open Match Day envelopes that would cement their future residency assignments.

"Match Day is one of the most significant events in a medical students' life," says SELECT assistant dean of student affairs, Michael La Rock, MD. "It is the culmination of many years of hard work and has an impact on a doctor's future career. For couples there's even more at stake."

This year, 1,046 couples participated in Match Day. And while the stakes and the stress level are high for individuals, they're amped further for couples who wish to be matched in close geographic proximity to each another.

For Myers and Kim, the news was good – they both matched at Allegheny General Hospital in Pittsburgh, Myers with a residency in neurological surgery and Kim with a residency in internal medicine.

In all, 31 percent of the SELECT graduates matched to a program in Pennsylvania, and six matched at LVHN, including Northampton native Kellie Dunker, who matched with LVHN in pediatrics.

Change to Prescribing Schedule III, IV and V Controlled Substances

Through an internal audit, we learned that a number of Schedule III, IV and V controlled substances have been faxed directly from Epic to a pharmacy. While the system defaults to "print" controlled substances, there is a glitch allowing this to be changed to "fax" in some instances. Pennsylvania law expressly prohibits this type of electronic transmission (computer to fax) to order Schedule III, IV and V controlled substances, so this capability has been disabled.

FAQ

Q: Is faxing Schedule III, IV and V controlled substances permitted at all?

A: Printing, manually signing, then faxing to the pharmacy is allowed. Computer-to-fax transmission is considered electronic transmission and is not permissible without additional infrastructure, login steps and other compliance measures.

Q: We could fax Schedule III, IV and V medications in CPO, so why not Epic?

A: CPO was unable to differentiate scheduled medications, so when overridden, it would send a signed prescription via fax.

Q: If we override the default setting to print and attempt to fax, what happens?

A: Behind the scenes, the prescription will be reset and print.

Q: Why can't we currently e-prescribe controlled substances?

A: Federal and state laws have introduced strict security requirements for both providers and pharmacies for entities seeking to electronically transmit scheduled medications. Among these measures, providers are required to provide dual authentication (for example, login plus token/fingerprint). We will need to upgrade the hardware across the network in the future to accommodate this ability.

Checking in on HCAHPS Survey Scores

With numerous competing projects and fires to put out, maintaining good lines of communication with our patients can be a challenge. The HCAHPS survey of inpatients asks them how we are doing with physician communication. In this fiscal year we hit a high point with LVH–Muhlenberg achieving the 50th percentile. As of February, LVH–Muhlenberg dropped to the 6th percentile, while LVH–Cedar Crest climbed to the 30th percentile.

We oversample patients to have significant data drilled to the site level, but the sample size is not perfect when drilling down to the physician level. However, we have a chart that shows data by the discharging physician over the past 12 months. The attending physician of record at discharge may not be the perfect person to tag to HCAHPS results in many cases, but it is a work in progress to help provide some insight. Similar to clinical test results, just because it is not perfect, doesn't mean we can ignore it.

The example here is a rollup of all the physicians at LVH–Cedar Crest and LVH–Muhlenberg. In the HCAHPS physician communication category, we achieved a score of 77.1, which means 77 percent of our patients gave us the best possible answer. In a nationally competitive field, that leaves us at the 18th percentile. Eighty-two percent of the country is better than us.

Skill of physician is a Press Ganey question where we achieved a high score of 91.1. Press Ganey is on a scale of 1 to 5, where we receive partial credit (unlike HCAHPS). However, there were still 71 percent of physicians nationally that scored higher. This chart is available for any discharging physician with individualized scores and sample size.

For questions or feedback on this article, contact [E.J. Rovella](#), program manager, HCAHPS/Patient Experience at 610-402-4844.

Author Rights: Why They're Important

Author rights are rights that a creator retains in a published work after transfer of some rights to a publisher through a legally binding author agreement. Giving up rights may limit access to and impact the work or use of it. Author rights are a part of copyright law.

Why should you care about author rights? The rights for all works created within your role as an employee of LVHN or using any of LVHN's resources are owned by LVHN. At LVHN, retaining author rights is required by LVHN's intellectual property policy. Many publishers attempt to have you sign over all author rights. It is in the publisher's best interest to retain as many rights as possible. LVHN's author addendum modifies and supplements the licensing and or publishing agreement. Make sure to review author agreements carefully before signing. Once signed, adhere strictly to the points outlined.

For more information on author rights, click [here](#) or check out Library Services' [author rights subject guide](#). If you have any questions contact Library Services at LibraryServices@lvhn.org or call 610-402-8410.

24th Annual Golf and Tennis Classic

The 24th Annual Golf and Tennis Classic will be held May 16 at Saucon Valley Country Club. The golf format is scramble/shotgun start. The tennis format is mixed doubles/round robin start.

Proceeds benefit LVH–Muhlenberg.

For sponsorships or player reservations, contact Sandi Marsh, special events planner, at 484-884-9119.

Papers, Publications and Presentations: April 2016

- William Miller, MD, chair of the department of family medicine, co-authored an article, “Interprofessional teamwork innovations for primary health care practices and practitioners: evidence from a comparison of reform in three countries.” It was published in the Journal of Multidisciplinary Healthcare, Volume 9, January 2016.
- Beth Careyva, MD, and Brian Stello, MD, both of the department of family medicine, co-authored an article, “Clinician-reported barriers to group visit implementation.” It was published Feb. 16 online ahead of print in the Journal of Primary Care & Community Health.
- Laura Dunne, MD, of the department of family medicine, co-authored an article, “Application of pre-participation cardiovascular screening guidelines to novice older runners and endurance athletes.” It was published Jan. 8 ahead of print in SAGE Open Medicine.
- Ronald Freudenberger, MD, MBA, Walter and A. Hazel May Chair for Excellence in Cardiology; chief, division of cardiology; and medical director, Charles Chrin Heart and Vascular Center, recently co-authored an article, “The current approach to diagnosis and management of left ventricular noncompaction cardiomyopathy: review of the literature.” It was published Jan. 11 online ahead of print in the journal Cardiology Research and Practice.

- Kevin Vrablik, MD, MPH, FACOEM, of HealthWorks, co-authored an article, "What is a potential source of ozone in the health care environment?" It was published in the Journal of Occupational and Environmental Medicine, Volume 58, Number 2, February 2016.
- Kenneth Katz, MD, Isamu Yoshioka, MD, and Ryan Surmaitis, DO, of the department of emergency medicine, co-authored an article, "A 17-year-old girl with cough-pulseless after drug overdose." It was published in the journal Pediatric Emergency Care, Volume 32, Number 3, March 2016.
- Kenneth Katz, MD, of the department of emergency medicine, co-authored an article, "Pentobarbital toxicity after self-administration of euthasol veterinary euthanasia medication." It was published Jan. 3 online ahead of print in the journal Case Reports in Emergency Medicine.
- Richard Mazzaccaro, MD, PhD, and Kathleen Kane, MD, of the department of emergency medicine, co-authored an article, "Acute cerebellar ataxia: an unusual pediatric case." It was published Feb. 15 ahead of print in the Journal of Emergency Medicine.
- Matthew Niehaus, DO, Allison Rusgo, MPH, PA-C, Kevin Roth, DO, Jeanne L. Jacoby, MD, of the department of emergency medicine, co-authored an article, "Retropharyngeal air and pneumomediastinum: a rare complication of influenza A and asthma in an adult."
- Robert X. Murphy Jr., MD, associate chief medical officer, was recently invited to be a visiting professor at the Ibero Latinamerican Meeting of Plastic Surgery in Uruguay. He served as faculty during the Quality section of the program and gave two talks: "The use of databases in quality improvement initiatives to improve hospital and personal practice" and "The use of databases in development of risk assessment tools." He was also elected to the board of directors of the International Confederation of Plastic Surgery Societies (ICOPLAST), the global organization representing national plastic surgery societies whose mission is to improve the quality of patient care through international cooperation and education. He is the first U.S. representative elected to the board. The other members are from Japan, South Korea, Australia, Peru, Brazil, Canada, Egypt, the Netherlands and the United Kingdom.
- Sigrid Blome Eberwein MD, of the Burn Recovery Center, presented March 11 at the conference Trauma 2016: A Continuum of Care at DeSales University. Her presentation was titled, "Once bitten, twice regretted an update on snake and frost bites."
- Donald Levick, MD, MBA, chief medical information officer, spoke March 2-3 at the national meeting of HIMSS (Healthcare Information Management Systems Society) in Las Vegas. On March 2, he presented with Kim Castagna, administrator, information services, on the Epic ambulatory

go live, “The hard truth about a soft go live, a new recipe for success.” On March 3, he presented with Lori Yackanicz, administrator for enterprise analytics, “The evolution of data governance in healthcare-does it ever end.”

April Seminars, Conferences and Meetings

Department of Education Conferences

- April 14 – Ninth Annual Ethics Symposium
- April 23 – Second Annual Urology Symposium
- April 30 – Update in Cardiology
- May 10 – Feather Lecture
- May 12-13 – Stroke Symposium
- May 19 – I Pink I Can

For more information, call 610 402 2277, option 1, or visit [LVHN.org/ce](https://www.lvhn.org/ce) calendar.

Pediatric Grand Rounds

- April 12 – Update on CMV Infection in Neonates and Young Infants, with Patrick Philpot, DO;

Kasych Family Pavilion ECC Room 7 at LVH–Cedar Crest

- April 19 – Professionalism and Leadership, with Robert Barraco, MD, MPH, FACS, FCCP, associate dean for educational affairs; Kasych Family Pavilion ECC Room 8 at LVH–Cedar Crest
- April 28 – Living with Cystic Fibrosis: Issues Concerning the Disease, Access to Care and Transition of Care from the Child to the Adult, with Robert Miller, MD, pediatric pulmonologist; Kasych Family Pavilion ECC Room 8 at LVH–Cedar Crest

The department of pediatrics holds Grand Rounds on Tuesdays, beginning at 8 a.m., in the locations noted.

For more information, contact [Cari Coelho](#) in the department of pediatrics at 484-862-3131.

Surgical Grand Rounds

- April 26 – Update on Sepsis, with Michael Pasquale, MD, and Matthew McCambridge, MD

Surgical Grand Rounds begin at 7 a.m. in the LVH–Cedar Crest auditorium and are videoconferenced to the first floor conference room at LVH–Muhlenberg.
